

Michael Hurley

michaellouisshurley@gmail.com | +44 7375 491291 | London, UK

Generalist operator and builder: frontend development, automation systems, enterprise GTM. Founding team at KEATH.ai (\$50M valuation) — built the product, closed the deals, ran the fundraise, negotiated with governments.

Professional Experience

ELO AI | Founder

August 2025 – Present | AI research platform surfacing LLM disagreements to identify knowledge frontiers

- Built product to beta with 200+ waitlist users and 12 PhD researchers testing; secured 3 PI advisors
- Led investor outreach to late-stage discussions; designed product architecture and GTM strategy

KEATH.ai | Founding Team – UX Architect & Frontend Developer

October 2023 - Present | AI assessment platform, 25+ university partners globally, \$50M valuation

Deployed across product, engineering, sales, and operations as the team's generalist problem-solver.

- Built entire frontend from scratch; sole developer on customer-facing product; designed all UI/UX flows
- Developed bespoke CRM for sales pipeline and customer lifecycle; created automation systems and quote generators
- Upskilled internal dev team on AI-augmented development workflows, accelerating product velocity
- Took hundreds of enterprise sales calls; closed institutional deals; generated 100+ leads personally at BETT
- Managed complete due diligence; built entire data room; closed round establishing \$50M valuation
- Negotiated national rollout with El Salvador Ministry of Education
- Press in Business Insider (x2), FE News, PIE News; created all promotional video content

Consulting & Freelance

May 2023 - Present | Deployed into early-stage companies to build systems and solve bottleneck problems

The Turing Learning Initiative for AI Proficiency — Automated business operations and revamped UI, Website and Brand. Upskilled dev team on AI tooling/workflows. Developed course content for AI proficiency exam drawing on applied AI expertise.

Fajj (Saudi Arabia) — Connected Saudi hotels with Umrah agents; structured wholesale deals and partnerships; made outreach system that qualified and found warm leads.

YK Pao School (Shanghai) — Built curriculum-aware AI tutors deployed to students with custom assessment workflows.

Early-stage product builds — Built authenticated MVP (frontend + backend) for corporate trainer marketplace including AI assessment systems. Developed AI tutoring system with quiz workflows for edtech LMS and negotiated governmental deployment.

Other clients — AI chatbots, automation systems, and web development for SMEs.
